Projects

2. SE Miniproject -
Terminal Games using Java Client Server Socket Programming

3. Employee Training Website -
- Role-based Access Control: Implemented distinct dashboards and permissions for HR, Employees, Admins, Trainers, and HODs.
- Course & Category Management: Enabled creation and management of training categories and courses.
- Training Calendar: Built a visual calendar interface
- Attendance Tracking: Developed modules to record employee attendance for each training session.
- Training Evaluation: Integrated evaluation forms and scoring to assess training outcomes

4. Kanban Task Management Application -
- Developed a Kanban-style task management application with real-time workflow visualization.
- Enabled users to create boards, task lists, and cards, representing projects, stages, and work items.
- Integrated drag-and-drop functionality to intuitively move cards between different lists or workflow stages.
- Added support for task assignment, due dates, detailed descriptions, and file attachments within cards.
